BAN IS PLACED ON ACTIONS BLAIRMORE TOWN COUNCIL

At a regular meeting of the Blaimore Town Council on Monday night, telegrams and correspondence from the provincial department of municipal affairs were read, to the effect that the department would not permit the council to carry out their plan in fulfillment of an election promise, to dismiss C. M. Larbalastier, recently installed as secretary-treasurer, to give place to Robert Horne.

The deputy-minister pointed out that the mayor or council had no authority to hand over the books or records to a new town secretary-treasurer until the town's choice had been approved by the department.

At a recent meeting of the council, motion was made to give Mr. Larbalastier 20 days notice that his services were being dispensed with. At Mr. Larbalastier's request, the motion was taken to read "7 days" and was passed, and Mr. Larbalastier was all prepared to leave here on Sunday last, when word from Edmonton just previous to that date ordered him to remain in charge.

A number of accounts were passed for payment and communications were dealt with. One of the latter was from the National Committee of Unemployed, asking that one or two delegates be sent from Blaimore to the national congress to be held in Ottawa in September.

Councillors Evans and Olsen were absent.

DEATH OF JOHN MCMURCHIE

John McMurchie, an old timer of Southern Alberta, and brother-in-law of Hon. Archie McLean, former minister of public works, passed away at his home in Macleod on Thursday last at the age of seventy-six.

Mr. McMurchie is survived by one son, James, of the C.P.R. depot staff in Blaimore. He and Mr. McLean were present to the end. Mrs. McMurchie predeceased him two years ago. They had moved to Macleod from Pincher Creek some ten years ago.

The remains were laid to rest at Macleod on Sunday afternoon, Rev. Mr. Blackburn, of Medicine Hat, officiating.

John McMurchie was born at Newmarket, Ontario, on July 3rd, 1857.

TIM BUCK IS GIVEN ADDITIONAL SENTENCE

For his part in conducting a riot in penitentiary, Tim Buck has had another nine months added to his five-year term.

Besides Buck, about a dozen other inmates of the penitentiary, who had been convicted or pleaded guilty to taking part in the riot, were sentenced to terms ranging from nine months to two years.

In passing sentence, Judge Deroche told the former Communist leader that he had been impressed by Buck's "gentle and manly" cross examination of witnesses while conducting his own defence. He added that there were circumstances which enabled him to pass a light sentence. The maximum applicable in Buck's case was seven years.

Buck made one final appeal for leniency and strongly urged that a royal commission be appointed to investigate conditions in the penal institution.

Among the other convicts was John Evans, negro, about whom interest in the dramatic trial centered last month. The youthful colored prisoner was sentenced to two years in the penitentiary to begin on the expiration of his present term.

In passing a one-year reformatory sentence in the case of Convict Hugh Burling, Judge Madden expressed the opinion that the 23-year-old criminal had been the "goat" of the demonstration and was "not as bad as he thought he was."

CHARLES H. HARRISON CALLED BY DEATH

Death claimed another of Blaimore's highly respected citizens at an early hour on Saturday morning last, in the person of Charles Hutchinson Harrison, son of Mr. and Mrs. William Harrison, pioneer citizens of Blaimore, who passed away following a critical operation at the local hospital.

Mr. Harrison was ill but a week. He was employed at Greenhill mine and went on shift as usual on the night of Friday, the 7th. At an early hour on Saturday, he was stricken with pains and was obliged to return home. A doctor was called and upon examination ordered him removed to the hospital, where a few hours later the operation was performed. He rallied for a week, with very little hope entertained for his recovery, till about 2:30 a.m. on the 15th the spark of life fled and his sufferings ended.

Funeral took place on Monday afternoon from the Crow's Nest Undertaking Parlor, arrangements for which were in charge of the local lodge of Elks. Also in attendance were members of the B.E.S.L. and Blaimore Miners' Association, followed by a large concourse of citizens.

At the United church, an impressive service was conducted by Rev. A. E. Larke, during which an appropriate deed was rendered by Mr. and Mrs. Larke. The funeral cortege wended its way to the Union cemetery, where the remains were laid to rest beside those of little son, William Clasper, who died seven years ago. At the graveside, in addition to the last rites of the United church, burial ceremonies were conducted by the Elks and Miners' Association, and "God Post" was sounded in behalf of the veterans.

Fallbearers were: R. W. H. Pinkney, G. Meffan, T. Hills, R. Jamieson and N. Oliver.

Mr. Harrison was but forty-six years of age, and a veteran of the Great War, in which a brother, Mark, was killed in action. Another brother, Thomas, died some years ago in Seattle, while the first break in the family occurred in England prior to the parents moving to Canada, when a daughter was called by death.

He is survived by his wife and seven children, five of whom are under thirteen; also his parents, Mr. and Mrs. Harrison; one brother, Richard, postmaster at Michel, B.C.; a sister, Mrs. Fred Gilroy, of Hillcrest, and a step-brother, Joseph Handley, of Creston, as well as a host of other relatives in England and Canada.

Deceased was born in Baldersdale, Yorkshire, England, in 1857. During the war he enlisted and saw service with the 40th Battalion.

By special request, floral tokens were few, but expressions of sympathy were received from far and near, many of which were of a far more tangible nature.

In the death of Mr. Harrison, the town of Blaimore has lost one of its most highly respected citizens, and the family a devoted husband and father.

Mrs. Harrison and children, together with Mr. and Mrs. William Harrison, sons and daughter, desire through The Enterprise to sincerely thank all those who assisted or offered assistance during Mr. Harrison's illness, as well as those who so kindly sent floral tributes of sympathy and respect, and who furnished cars for the funeral, or in any other way assisted.

SUCCESSFUL MUSIC PUPILS

The following pupils of W. H. Moser, teacher of violin, of Hillcrest, were successful in the examinations recently held by Mr. Harry Isaacs, of the Associated Board:

WORLD HAPPENINGS BRIEFLY TOLD

Dr. E. T. Lila Burke, 58 years old, of Morrison, N.J., was the three-millionth visitor to pass through the gates at the World's Fair, Chicago.

Great Britain's unemployment figures show 144,771 fewer unemployed on June 26 than a month before, and 809,235 fewer than a year ago at that time.

Mr. Justice William Alfred Gauthier, member of the British Columbia Court of Appeal since it was established 24 years ago, has retired because of ill-health.

Subscriptions and collections in the Toronto diocese restoration fund for Western Canada have already reached a total of \$240,061, or slightly more than 96 per cent. of the whole three-year objective.

Experimenters have come within one-quarter of a degree of Centigrade of producing absolute absence of heat. They produced, at the University of California, 459.1 degrees below zero Fahrenheit.

President Roosevelt has assigned two college professors—James H. Rogers of Yale, and George Warren of Cornell—to absolute special study of United States government financing and balancing of the budget.

Governments of the United States and Canada have been given an interim report from the commissioners set up to arbitrate the "In Alone" case, and the next scene in the proceedings will probably be laid in Washington.

The Communist party has taken vigorous steps to bolster up Soviet Russia's faltering railway transport system, ordering immediate creation of "transport political sections" to strengthen labor discipline and weed out hostile elements throughout the entire organization.

Future of the empire marketing board, the organization formed to stimulate sale of empire products in Britain, is still undecided. J. H. Thomas, secretary for the Dominion, indicated no agreement had been reached about dividing expenses of the board between the United Kingdom and other empire governments.

One Way To Decide

Einstein Advances Future To As His Fame In Future

Professor Einstein appears to be something of a wit, for he has propounded a very good test of his fame with posterity. He says that if, in after years, the Germans declare that he was a German, and the French say he was a Jew, then he really was a great man. But if the Germans call him a Jew, and the French are emphatic in declaring him a German, then there can be no possible doubt that he was a failure. The mathematician who has astounded and sometimes puzzled the world by his theory of relativity, is to receive an L.L.D. from Glasgow University shortly. He intends to deliver some mathematical lectures at the same time which will be open to the public.

Useful In Many Places

Telescope In Toronto University Would Help Out Otter

A two and a half ton glass disk has been ground for the great telescope which is to be installed at the University of Toronto. How useful that telescope would be in the front room of a Chicago flat during the World's Fair, You could see your relations from the country coming to stop at your house before they crossed the county line. There would be plenty of time to hang the sign on the front door, "Gone to Europe, Will Not Return Until Christmas."—Chicago Tribune.

Stole Roosevelt's Gun

Possibly the thief who visited the North Dakota exhibit at the Century of Progress wished to have something to make a loud noise on the fourth of July. He took a revolver Theodore Roosevelt used as a young rancher at Medora, N.D. So treasured is the weapon that no questions will be asked if and when it is returned.

What is believed to be the biggest sunflower in the world was grown by a man in New Zealand. The flower was 17½ inches across; the stalk 2½ inches in diameter and 11 feet three inches high.

"Mother, Helen is awfully lazy," "Why dear?" "I said, 'Let's play house,' and she said, 'No, let's play apartment; it's less work'."

Steamship Tonnage

Gross, Net, Deadweight and Displacement Explained In Simple Manner So The Landman May Understand

Many people seem at a loss to know what tonnage means. The various kinds of tonnage are often a bit confusing. For the benefit of those the Cunard Line has distributed the following information:

To begin with, vessel tonnage should not be confused with cargo tonnage. A cargo-weight ton is 2,240 pounds, while a cargo-measurement ton is 40 cubic feet. A vessel-measurement ton is 100 cubic feet. The carrying capacity of ships is limited by the amount of measurement space available within their holds, and by the amount of weight they can safely carry. This is called register or deadweight tonnage, respectively.

The five kinds of vessel tonnage are as follows:

Gross register tonnage.—The total enclosed space of a vessel, expressed in measurements of 100 cubic feet, including engine room, bunkers (fuel) spaces, crew quarters, storerooms, cargo spaces, etc.

Net register tonnage.—The total enclosed spaces of a vessel available for cargo and passengers, in measurement tons of 100 cubic feet.

Total deadweight.—The number of weight tons of 2,240 pounds, consisting of cargo, fuel, stores, supplies and fresh water for the boilers, etc., required to put a vessel down to her marks, her maximum load-line.

Deadweight cargo capacity.—The number of weight tons of 2,240 pounds, which a vessel can carry as cargo after deducting the weight of fuel, stores, supplies, and fresh water required for the boilers, etc.

Displacement tonnage.—The equivalent of the weight of the water displaced by a vessel fully loaded and ready for sea; it is the largest tonnage dimension of a ship, but is not commercially important.

Helped Oil Lamp Industry

Depression Has Increased Working Forces In Glass Factories

Believe it or not, but it took the depression to bring a dying industry back on its feet and start paying dividends.

Increased demand for oil lamp chimneys and lantern globes since hard times had been felt, resulted in the doubling of working forces of a glass company in Fort Smith, Arkansas, and huge increase in others. Glass products have been slumping since the "horse and buggy era."

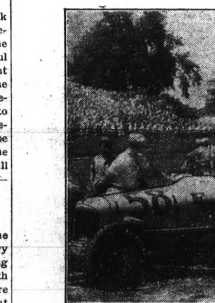

An officer of one of the companies said the oil lamps are cheaper to operate than electric or gas lights. He also asserted the "back to the farm" movement had contributed to prosperity in the industry.

Canada's Farm Wealth

Gross agricultural wealth of Canada in 1932 is estimated approximately at \$5,069,820,000. The two provinces which go over the billion dollar mark are Ontario and Saskatchewan, the former with \$1,366,725,000 and the latter \$1,143,669,000.

The number of illiterates in the United States is 4,283,773. This is a drop of 33 per cent. in a decade.

Farm Tractor With Air Balloons Makes New Record

Frank Brisko, noted racing driver at wheel of tractor with which he set an official world speed record of 35.4 m.p.h. for five miles, the other helmeted racing driver is Chet Gardner, and beside the big tire are Bill Cummings, a plowing demonstration with this Firestone air-tired Al-Chalmers tractor. At the left is the \$30,000 P.W.D. racing car Brisko drove after the tractor run.

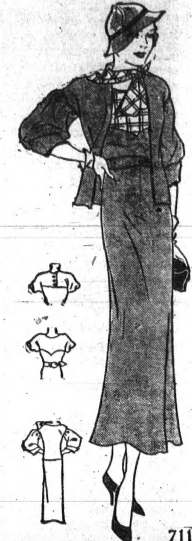

Farm Tractor, With Air Balloons Tires, Makes New Record

Enthusiasm of farmers for pneumatic tired tractors is making tractor manufacturers seek higher speeds to make "the tractor more valuable for hauling or travel, and for use as an all-purpose farm machine. The most interesting speed performance is the recent official A.A.A. record of 35.4 m.p.h. for five miles made by a tractor at the Wisconsin State Fair Grounds A.A.A. race.

Thousands of people watched Albert Schroeder, a prominent Wisconsin farmer, using a new standard

By Ruth Rogers

TRIM AND JAUNTY JACKET . . . DRESS THAT WILL GIVE DASH TO YOUR SPRING WARDROBE

Good looking jacket dress for youth and youthful women types.

It is navy blue this woolen weave with coral-red plaided crinkly crepe silk contrast.

It is effective too in gray crinkly crepe silk with navy crepe.

The jacket has the smart shoulders that jut out over the arms and the interesting back buttoned closing of the dress.

Style No. 711 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3¼ yards 54-inch with 1½ yards 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (a preferred). Wrap coin carefully.

ISAIAH DENOUNCES DRUNKENNESS AND OTHER SINS

Golden Text: "Righteousness exalteth a nation: But sin is a reproach to any people."—Proverbs 14:34.
Lesson: Isaiah 5:1-30.
Devotional Reading: Psalm 85:7-13.

Explanations and Comments

The Sin Of Greed, verses 8-10.—Woe unto the rich and powerful, cries the prophet Isaiah, woe unto those who are so avaricious for large estates that they "join house to house," "seize houses of the poor, and lay field to field till there be no room (for the peasant). And ye be made to dwell alone in the midst of the land." The time would come when the land would be in the possession of only a few. The Hebrew law (Numbers 35:24) provided that there should be a proportional division of the land, and there were stringent laws against the alienation of hereditary family rights: see Lev. 25:8-17; Deut. 27:17.

Every fifty years, the Jubilee year, all the land was to be returned to the original owners. But the law was abrogated. The Hebrew regulations regarding the seventh year of fallow and the fiftieth year of release was the principle that "The earth is the Lord's not the landowner's"; that it was held in trust for the benefit of all the people. When the commercial development of Israel came, the primitive land system was lost. The independent farmers were impoverished by taxes laid to pay for wars. The land was taken for loans made by the merchants. The farmers became poor and the land was degraded. This is why the prophet cried the wrath of God upon those who joined land to land, and on the religious leaders who "devour widows' houses."—John Bayne Ascham.

"To mine ears saith Jehovah of hosts," Isaiah continues, "In Hebrew to 'say into the ears' does not mean to speak secretly and softly, but, as Genesis 23:10-26; Job 33:8, and other passages show, to speak in a manner that is distinct and intelligible, and excludes all misunderstanding. The prophet is able to distinguish distinctly the thoughts in words of his own age from the inexpressible of Jehovah which rises loud within him."—Deitzsch. "Of a truth many houses shall be desolate, even great and fair, without inhabitant," because the land will be barren, verse 10. "For ten acres of vineyard (literally, ten yoke, or ten times as much as a pair of oxen can plow in a day) shall yield one bushel (the largest liquid measure, about eight gallons), and a homer (the largest dry measure, ten or twelve bushels) shall yield but one ephah (a tenth of the seed sown)." "Will waste the land, to every ill I prey, Where wealth accumulates and men decay."

Fate Was Kind

After driving his automobile from his home in Berlin, Ohio, to Millersburg, seven miles away, Alvin Miller discovered that his two-year-old daughter was perched, sound asleep, on the running board of the machine. A pedestrian at Millersburg informed the father of the sleeping girl.

The greatest trouble with the world is that a great majority of people are trying to make it better for themselves instead of making something of themselves.

The total quantity of barley in Canada on March 31, 1933, is estimated at 26,794,218 bushels as compared with 28,751,468 bushels in 1932.

The surveyor in his report points out that there are two little-known but feasible canoe routes, using Mudjatik River, from the Churchill to Lake Athabasca. One is to follow up the traversed route to Swan Lake and then via a stream which enters the northeast end of the lake to reach the height of land and the headwaters of McFarlane River which empties into the east end of Athabasca Lake. The other route goes through Swan Lake and follows down Clearwater River to its junction with the north branch of the river which is ascending to the height of land in a swamp which also feeds Williams River which may then descend to reach Lake Athabasca about midway on its southern length.

The chief product of this area is fur and the whole area is fairly well trapped over by Indians and a few white trappers. The chief fur-bearing animals are muskrat, mink, marten, otter, and some beaver. Some moose and deer are found and are hunted by the Indians. Mr. Perry reported that the eastern half of the area appeared to be better game country than the western half. A fair plenty in the larger lakes and considerable commercial fishing is done in the lake. The surveyor is planning the headwaters of Churchill River. These fish are frozen and sent to Big River. Ducks are plentiful along the Churchill, Hudson, and Haultain Rivers. The Hudson's Bay Company has a trap line on the Churchill River about one-half a mile from the mouth of the river. This is the best place to trap muskrat in the winter, as there is practically no trading during the summer.

Vast Fur Country

Large Areas In Northern Saskatchewan Profitable Field For Trappers

There are large areas in Canada in which it is practically the only resource developed up to the present time. A century ago the value of the export trade in furs exceeded that of any other Canadian product, but the relative values of our exports have greatly changed since then. In 1667 furs to the value of \$50,000 were exported chiefly to France and the West Indies. In 1850 Dominion trade tables show the value of raw furs exported to have been \$93,872. These figures increased to over \$24,000,000 in 1929. Although the value of this trade has decreased during later years, Canada may still be described as one of the great fur preserves of the world.

One of the areas where fur is still king but which has possibilities for development along other lines is shown on the Mudjatik map sheet just published by the Topographical Survey, Department of the Interior, where copies may be obtained at a price of twenty-five cents each. It covers a block of over 5,000 square miles in northern Saskatchewan, the southeastern corner being nearly 200 miles almost due north of the city of Prince Albert, and is named from the Mudjatik River which flows south by across it to empty into Churchill River just below Lake Athabasca. The map was made from oblique photographs taken by the Royal Canadian Air Force and tied in to a ground survey of the Churchill River and to astronomical observations for latitude and longitude.

The country part of the Precambrian or Canadian Shield and has many of the characteristics of that region. The surface generally is level, the east of Mudjatik River being rougher than that to the west. The map shows a very complex drainage pattern in the lower centre of the area, suggesting that folded strata underlie this part.

The whole district is forested, the principal species being jackpine, although there is also a fair amount of poplar, spruce, tamarack, willow, and alder. Forest fires have swept over considerable areas at various times in the past, but new growth soon springs up again.

The mapped portion contains a number of small lakes and connecting streams. The drainage is to Churchill River with the exception of a small area in the northwest corner of Black Birch Lake drains westerly to Clearwater River in the Mackenzie River drainage basin.

Mudjatik River is a well defined valley; it has an average current of about two miles per hour and can be navigated by craft having a draught of thirty inches. Downstream navigation is fairly simple to an extent of about thirty miles. There are, however, a number of portages to be used in low water and for going upstream, a tributary of the Mudjatik is the cause route to Cree Lake. Haultain River also flows southerly across the area.

Churchill River flows in the same direction as the Mudjatik although carrying a slightly larger volume of water. This district is reached by canoe from the Churchill River. A. M. Perry, D.L.S., who laid down the control traverse for this map sheet, came from the railway terminus at Big River via Cowan Lake, Cowan River, Beaver Lake, and Clearwater River. Churchill River, Churchill, Frohisher, Turner, and Wasekama Lakes, at the latter of which he commenced his survey starting from a monument on the twenty-third base line. In the area shown on this map Black Birch Lake was traversed, Gwiltin and Mudjatik Rivers were surveyed, and twenty-four permanent reference monuments established.

The surveyor in his report points out that there are two little-known but feasible canoe routes, using Mudjatik River, from the Churchill to Lake Athabasca. One is to follow up the traversed route to Swan Lake and then via a stream which enters the northeast end of the lake to reach the height of land and the headwaters of McFarlane River which empties into the east end of Athabasca Lake. The other route goes through Swan Lake and follows down Clearwater River to its junction with the north branch of the river which is ascending to the height of land in a swamp which also feeds Williams River which may then descend to reach Lake Athabasca about midway on its southern length.

The chief product of this area is fur and the whole area is fairly well trapped over by Indians and a few white trappers. The chief fur-bearing animals are muskrat, mink, marten, otter, and some beaver. Some moose and deer are found and are hunted by the Indians. Mr. Perry reported that the eastern half of the area appeared to be better game country than the western half. A fair plenty in the larger lakes and considerable commercial fishing is done in the lake. The surveyor is planning the headwaters of Churchill River. These fish are frozen and sent to Big River. Ducks are plentiful along the Churchill, Hudson, and Haultain Rivers. The Hudson's Bay Company has a trap line on the Churchill River about one-half a mile from the mouth of the river. This is the best place to trap muskrat in the winter, as there is practically no trading during the summer.

Something To Think About

Canadians Not Bothered With Banking Troubles Like United States

W. L. Clark, writing in Border Cities Star, says some of the banks in Maine have not reopened yet. Closed for about three months, the bank holiday has hit some people hard. Here is a case told about in Portland. A man, formerly of Montreal, had a savings account in one bank. He wanted some money for a business transaction, and instead of drawing his savings, he borrowed from the bank and put up some Government bonds as security. Then the bank closed.

The savings account of the man is more than sufficient to cover the loan he got from the bank. But they will not apply that amount against his loan. Instead, they are trying to sell his Government bonds to raise cash to pay off the loan. In other words, they not only have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

This was just one of the sad stories we heard. Another man sold a timber for \$30,000, put the cash in the bank one afternoon and the second day following, the bank shut down. He has not been able to touch a cent of the \$30,000 since.

Many a widow, orphan, school, religious institution and other persons who have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

All Canadian who are talking about what the banks should and should not do might think of these things. Nothing like this has happened in Canada through the present depression.

Encouragement For Spain

Recent Flight Broke Atlantic Record For Distance and Time

In flying from Seville to Cuba the Spanish-built and Spanish-crewed "Custo Vientos," Captain Barberan and Lieutenant Collar have broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. Her name, it is true, has been kept before the world by international air races. Commander Franco, who with three other army officers made a flight to South America in January, 1925, and the following year flew from Spain to Brazil and Argentina. Lieutenant Collar has broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. Her name, it is true, has been kept before the world by international air races. Commander Franco, who with three other army officers made a flight to South America in January, 1925, and the following year flew from Spain to Brazil and Argentina. Lieutenant Collar has broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. HEART OF THE NORTH

WILLIAM BYRON MOWERY

Copyright by William Byron Mowery

CHAPTER XIII.—Continued.

As he went out along the slope toward the post, he was ruminating, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them tonight to their hour of separation. And yet, through his bitter mood ran the knowledge that in his sacrifice he had set all personal desires aside and had kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfilment.

Again he lived over that hour when he came upon a trapper's deserted, snow-drifted hut, and found Curt there, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that racked him as he knelt beside the bunk, whispering to a partner who was going down into the dark, leaving a sister penniless, alone in the savage North.

"Alan, she loves—you," he could hear those broken whispers that presently were stifled. "If you'd marry her—my sister, Alan. I wouldn't mind—going—if I could think of you—partner and brother, too—"

And over and over again that dying, whispered plea, and the ineffable peace that came when Alan made covenant, "I will, I will, Curt. I love her, too, because she's your sister."

And now, as he thought of that lone funeral sled trip home, and as he glanced up the slope toward Curt's towering lighthouse, his lips fashioned silently.

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

Joyce had helped Bill take her personal baggage down to the wharf, and had talked over with him final arrangements about forwarding the poultry to Edmonton and selling the trading store. Waiting for the steamer she had quietly stepped out of Mrs. Drummond's house into the garden back of it, telling no one where she had gone.

She was aware that Alan intended to come down before she left, for half an hour with her. She had slipped out in the garden to make that impossible. If he came down to the wharf at the last moment, she felt she could say good-bye calmly enough, with a brief handshake, a voyageur nod and bon chance; but a longer time with him would be unbearable. As she stood there, half-hidden by an arbor of morning glories, she saw a dim figure come out along the slope

from the direction of the woods edge, and as it passed her, scarcely a dozen feet away, she recognized Alan. He went on to the factor's house. She heard him knock, heard him ask for her, heard his puzzled, "That's odd," when Mrs. Drummond said she'd been gone for half an hour.

By a lightning flash Joyce saw him as he started on past her. Something in his manner, in his dejected head, in his slow beaten gait, let her know he was aware she deliberately had gone away in these last minutes and deliberately had shunned a parting talk with him.

As Alan went slowly past the garden, unconscious of the lightning flashes, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the wintry blackness. It sounded like his name. In surprise he whirled toward the arbor of morning glories, and as he stood there, listening, he heard it again—his name—Joyce's voice, half-sobbing:

"Alan! Don't—don't go. . . I'm—I'm here. . ."

CHAPTER XIV. The North's Call

As she worked on a report that evening in the little library nook, Joyce would pause now and then and listen intently, with her dark eyes peering into the blackness outside the window.

It was time for Alan to be returning with Bill and Ned from a patrol down the Mackenzie. In the sharp vigorous gusts of October wind she kept thinking she heard the drum of the launch. Across the room from her, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture-book, her tiny moccasins off, one arm hanging over the couch. In the deep dreamless sleep of babyhood the little tot was oblivious of the threat and smelt of autumnal wind swirling around the cabin. "If there was any sacrifice in having that airy little companion in her home, Joyce had not yet become aware of it."

The report she was working on was a statement to her former bureau chief in Ottawa of the money expended in her work among the Indian women around Edmonton.

During a lull in the wind she suddenly heard the unmistakable sound of the big police boat skimming up the wave-tossed Mackenzie. Putting aside her report, Joyce ceased being Deputy Indian Agent at Fort Endurance, N. W. T., and became the wife of Inspector Baker, officer commanding there. With a glance at the sleeping tot she flung a cape about her shoulders and went out the cabin and ran down the dark winding terrace toward the wharf.

When the yellow eyes of the launch drew near, Joyce saw a tall figure step upon the prow half-decked and stand ready with the painter chain.

When he jumped out upon the planning, jerked the launch alongside and lapped the painter around a pierhead, he turned to her, hat in hand, reproaching her:

"Girl, girl, you shouldn't have come down here, in this raw wet wind. You've got to begin learning to be careful."

Pedestals snapped off the launch searchlight, and as the two men began gathering their packs together, in the mantling darkness Joyce sensed Alan's reproach, rising on tip-toe, oblivious of his wet slicker and the cold steel of his gun buckle.

After supper, when Alan had made himself regal again after the six-days hard patrol, he stepped out into the living room where Joyce was finishing her report.

She beckoned him over to her, holding out several letters which had come for him on the Chipewyan mail. She had not opened them; but now when he brought a chair beside her, she read them with him.

Buzzard had dashed off a page from his apartment address in Winnipeg. He had "done" a couple dozen birds and pumpkin shows in his new Deltaville, but he found that his line too tame. Right now he was flying the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to boss the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting planes under him.

"Some time this winter (he postscripted), we might put skis on the crate and hop down north to visit you. But Alan, you find-out first if Joyce holds anything against me for telling you she burned that rainbow scarf. I don't think she ever has forgiven me."

Joyce looked up, laughing; but with a catch in her voice as she remembered that haunting day.

"And you notice the 'we,' Alan? He puts her into a postscript. She's just a mere afterthought! Who is she?"

"Louise of Kamloops, is all I know," Alan answered.

The next envelope was an enigma. It contained no message, no writing—nothing but two pictures. One was a panorama of a large country estate, with lawns, servant quarters, gardens, orchards. The other showed an imposing town residence, a stone building overrun by ivy, with a limousine waiting in the doorway.

Bewildered, Alan looked at the pictures twice, searched in the envelope for a possible note, glanced again at the address. And then, as he studied the crest of the envelope, he started a little. "This was from Elizabeth!" That insignia was the Lamoth-Haskell crest! Since Haskell married her and they left the North, they had written to him on one at Endurance; but Alan had heard that Haskell, transferred to a small detachment in the Kootenay coal fields, had resigned and gone east.

Suddenly understanding the pictures, Alan looked up at met Joyce's eyes, and he saw that she too understood. In a kind of scorn she remarked:

"That's like Elizabeth, isn't it, Alan? She wants you to realize she's got a country estate and town house and uniformed chauffeur and all the things that—that—"

"Say it!" Alan bade. "—All the things I'd never been able to give her. She's trying to rub it in. Yes, it's like her, Joyce."

"Sometimes I pity her a little—with him, Alan."

"I wouldn't say that, Joyce. I know her better than you did. I'd say, God pity him—with her."

With a gesture of finality he flipped the pictures contemptuously into the fireplace.

Later, when the lights of the post were dim, when the fire logs had burned to red coals and Joyce had carried her sleepy little charge away to bed, they went outside the cabin.

In the night sky they heard the honking of Arctic geese, last of the migrants, winging swiftly south; and they had the feeling that in the illimitable woods all furry creatures were seeking out warm dens and storing food for the Frozen Woods. Up and down the wilderness rivers and far-flung over the Strong-Woods, a whisper had gone abroad of a mighty change brooding—a whisper that drew lifeless courageous things into headlong flight, yet was but a challenge to those more valiant of heart.

The spirit of winter was in the air tonight; and Alan and Joyce were welcoming it. Here in the far North they had lived through other winters; they knew the savagery of those Moons and their white silent beauty, too. They had worked to keep them busied during the long dark, and a home against the blind swirling blizzards, and the vista of a life together here in this far land of their choosing.

(THE END.)

Because the force of gravity diminishes as a man rises above the surface of the earth, an engineer in Austria has invented a device for measuring the force to tell an aviator his altitude.

The person who goes through the year without illness is exceptional, for statistics ascertain 8500 cases of illness to each 1,000 persons in the United States each year.

Artificial sunshine has lowered the death rate in the London zoo.

WEAK WOMEN Take Lydia E. Pinkham's Vegetable Compound

"Have you ever felt that you were too weak to do anything . . . that you did not have the strength to do your work? Women who are weak and run-down should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Headaches and backaches that are the result of a tired, run-down condition often yield to this marvelous medicine. I am out of every 100 women who report to me that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results."

Rails Used As Medium

Conductor Can Converse With Other Trainmen Ahead Or Behind

The conductor in the caboose of a long freight train can now carry on a conversation with the engineer in the locomotive cab, or he can converse with those in charge of trains immediately ahead or behind his train on the same track by means of a new type of communication system developed by engineers of the General Electric Company.

"This new means of communication is not radio, carrier current or direct telephone in principle," says an announcement by the company. "Earphones are not required; with five watts or less put into the inductor coils, loud-speaker reception of ample volume to overcome train noises is received over a rail distance of five miles or more."

"The rails are used as the medium for the transmission and pick-up of signals, which are put into and taken out of the rails by inductor coils suspended from the caboose and locomotive at minimum clearance distance above the rails. These inductor coils are directly connected to the transmitting and receiving equipments."

Lesson For Canadian Soldiers

Learned Necessity Of "Mopping Up" At Battle Of Givency

The battle of Givency, when Canadians displayed great ingenuity by bringing up to the front lines two pieces of field artillery, was recalled at Montreal by Sir Arthur Currie, who commanded the second Canadian brigade on that occasion. When an attacking party penetrated as far as the first trench they were taken from behind by a party of the enemy who had concealed themselves in dugouts in the first trenches and had been overlooked, a fact which proved fatal to the first battalion, which was caught between two fires. It was in this battle that the Canadians learned the necessity of "mopping up" Sir Arthur, now principal of McGill University, said.

The two guns brought up into the front line did considerable damage before being disabled. Twenty of the 23 officers participating in the attack were killed.

The occasion of Sir Arthur's remarks was the anniversary of the battle.

Youth Seen in Attempt To Adjust

Edna Robb Webster

Stirred by modern youth's desperate efforts to adjust itself to the complicated demands made by life and a rapidly changing world, Edna Robb Webster, noted serial story writer, has given her attention to the problem in her latest book, "Occasional Wife," a romance of modern manners. The story begins in this paper at an early date.

Mrs. Webster takes as her two chief characters, Camilla Hoyt, adopted daughter of a wealthy family; and Peter Anson, poor and struggling artist. To marry the other daughter to marry, Camilla, whose foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but she is trying to carve out a career for herself as a commercial artist. To marry the other daughter to marry, Camilla, whose foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but she is trying to carve out a career for herself as a commercial artist.

Mrs. Webster's serial stories are known wherever newspapers are printed. She has written many favorites, among them "Dad's Girl," "Joretta," and "Lipstick Girl."

LOW PRICED but DEPENDABLE
OLDFIELD TIRES
made and guaranteed by Firestone

YOU do not have to sacrifice quality and mileage to get a low priced tire. Oldfield Tires—made by Firestone—have the quality and features of tires costing much more.

Only Firestone, with its vast resources and experience, could build such a big, full-sized, rugged tire with a Gum-Dipped cord body and a long-wearing safety tread to sell at such a low price.

Save money with Oldfield Tires. See the nearest Firestone Dealer today.

Have Universal Appetite

Some Biotics Eat Anything From Poisonous Drugs To Chocolate

The cigarette beetle which bores holes in cigarettes and prefers tobacco to other kinds of products nevertheless feasts on cayenne-pepper, ginger, rhubarb, rice, figs, yeast cakes and prepared fish food. The Dominion Entomological Branch is on the outlook to prevent its spread in Canada. Another beetle with a universal appetite is the drug store beetle, which makes no discrimination between poisonous or harmless drugs, its preference being for the deadly acetone and belladonna. It also bores holes in leather and books as a sideline, attacks dried beans and peas, breakfast foods, flour, yeast, bread and chocolate, has a weakness for the aromatic seasonings of ginger, and is said to tackle everything except cast iron. It is also under surveillance.

Determined To See Fair

Nineteen-Year-Old Toronto Boy Rides Bicycle To Chicago

When the desire to view the wonders of Chicago's Century of Progress Exposition came to Roy Gurey, 19, of Toronto, he didn't ponder ways of raising transportation fare. Instead, he mounted his bicycle and pedaled to the Illinois city in four days of arduous grinding. When Roy arrived he shook the kinks out of his legs by parading in and out of the exhibition buildings, viewing the sights of the Midway. Overnight he stayed at a Boy Scout Club.

Green Feeds For Poultry

In vitamin and mineral content alfalfa and clover show themselves to be the most satisfactory green feeds for poultry. Fresh or dry, these legumes are palatable and nutritious, the leaves of the alfalfa or clover if well cured serving as an efficient form of feed. Alfalfa meal or better still alfalfa leaf meal from well cured plants is also a suitable kind of green feed mixed in the mash. Dominion Poultry Husbandman.

A Brooklyn bakery is using radio wave heat to bake crustless bread.

Little Helps For This Week

"Giving thanks always for all things unto God."—Ephesians 5:20.

For blessings of the fruitful season. For work and rest, for friends and home.

For the great gifts of thought and reason.

To praise and bless Thee, Lord we come.

Yes, and for weeping and for weeping. For bitter hail and blighting frost. For high hopes on the low earth trailing.

For sweet joys missed, for pure aims crossed.

Notwithstanding all that I have suffered, all the pain and weariness and anxiety, and all the sorrows that necessarily enter into life, and the inward wrings that are worse than all, I would end my record with a devout thanksgiving to the great Author of my being. I am unwilling to make my gratitude to Him "a thanksgiving of mere words," but instead I would have it to be gratitude for all that belongs to life and being, for joy and sorrow, for health and sickness, for success and disappointment, for life and death; because I believe that all is meant for good.—Orville Dewey.

Italy's new highway for trucks exclusively has a great number of tunnels.

TOO FAST DRIVING

There have been quite a number of comments on the speed at which some of the young people of the town drive their father's cars round the streets. The present social demands scarcely seem to justify this terrific rush to get from here to there. In fact, quite frequently there appears to be no object, except to reach the end of the block as fast as possible, in order that they can turn around and get to the other end as fast as possible. If they were on missions of life or death, or carrying tidings of great joy, their actions would be more understandable. But as everyone knows, they have all the time there is to get where they are going, and, viewed in a large way, their errands are perhaps not particularly important. So there is really nothing to justify the rush.

Their violation of the rules of safety, good judgment and common sense are in most instances quite involuntary. They probably do not realize that they are regarded as danger spots in the community welfare. But this is true.

Fast driving within the limits of the town holds grave dangers. On every street, little children are moving thoughtlessly to and fro, and must be safeguarded. On every street, pedestrians are crossing from this side to that side, circulating harmlessly, and entitled to certain modest rights. They do not want to be mowed down, just because somebody is betting himself that he can graze them but not kill them. When cars move as freely and in such numbers through town, as they do at present, every driver should show by his driving that he is a responsible person, considerate of the welfare of all others in his vicinity. That is ordinary courtesy and manners.

Added to this, fast drivers are reminded of the very stiff penalties in the new Highway Traffic Act. If they violate highway regulations they are obliged to furnish proof of financial responsibility for accidents. In the case of young drivers who flirt with the possibility of accidents, it is assumed that they are depending on father to carry the burden if anything happens. This is scarcely a sporting attitude, and young people nowadays do pride themselves on sportsmanship. Under the new amendments, persons under 21 may be required to furnish proof of financial responsibility in applying for driver's licenses. So those who already have licenses should move very cautiously. It is easy to have a license cancelled in these days, and probably quite difficult to have it renewed. So have a care!—Vulcan Advocate.

Customer: "Any celery?"

Cockney Waiter: "Very small, sir. We as to rely on tips from gentlemen like yourself, sir."

First Boarder: "There are 14,000 oysters of full size in a ton."

Second Boarder: "Then this stew must contain one fourteen-thousandth part of a ton."

Murphy had been careless in handling dynamite, and Kelly was showing the task of conveying the sad news to his widow.

"Mrs. Murphy," said he, "isn't this the day the fellow calls for the payment on your husband's life insurance?"

"It is," was the reply.

"Well, now, a word in your ear," said Kelly. "Sure ye can snap your fingers at him today."

HEALTH CERTIFICATE BEFORE MARRIAGE

On July 1st, a new marriage law came into force in the province of Saskatchewan, which contains many new features, the chief of which is that which requires any applicant for a marriage license to provide a certificate of health.

The section reads: "Before application is made for a license or before banns are published, the male applicant is required to produce a certificate of health signed by a duly qualified medical practitioner, and it is necessary that the medical examination should have been made not more than ten days previous to the date of application for license or the proclamation of banns."

This is, we think, the first time such legislation has been passed in this country and one feature of it is the fact that the required certificate is demanded only from the man; it seems to be presumed that the woman is exempt from all the evils against which the new law attempts to guard.

The law is intended to prevent marriage between persons who are suffering from tuberculosis, venereal disease or chronic mental disease. Unfortunately, these troubles are by no means confined in their operations to the male sex. It is well to protect the country against the marriage of unfit males, but it is not just as necessary to safeguard it against the marriage of unfit females? Just why the requirement was laid upon the man and omits the woman we cannot say, but at first sight it appears rather unreasonable.—The New Outlook.

IRISH SWEEPSTAKES PROMOTERS ALARMED

The promoters of the Irish sweepstakes are alarmed at their waning popularity in Great Britain. This is shown by the recent decision to boost the sale of tickets by running a \$2500 monthly lottery on the ticket numbers.

This year's receipts have dwindled. The sweep revenue of the Grand National fell by \$1,000,000 compared with last year, while the Derby sweep slumped by \$500,000.

It is feared that there will be a further drastic fall in subscriptions, as the people of Great Britain who subscribe the vast bulk of the money, realize exactly what happens to their money when it reaches Ireland.

One-half the money never comes back, claims the Daily Express. It remains in the Free State. To provide funds for Mr. de Valera's administration; to make fortunes for the promoters; to pay a \$10,000,000 wage bill for the thousands of clerks and accountants in a great new Irish industry, and to rebuild Irish hospitals.

It is estimated that of the \$100,000,000 total revenues of the nine sweeps, Great Britain has subscribed \$95,000,000 and received only \$50,000,000 in prize money.

Out of the last five sweeps, Mr. de Valera has taken a direct tax of \$5,000,000. This money has enabled him to pay bounties to Irish farmers against whom Britain imposed a tariff because Mr. de Valera withheld the Irish annuities.

Here are some of the answers on recent examination papers: The masculine of vixen is vicar. An epistle is the wife of an apostle. Joan of Ark was the wife of Noah. A grass widow is the wife of a vegetarian.

Hettie Ball, waitress, was shot to death in a cafe booth at Nelson. Miss Ball formerly resided at Nal. Martin Coleman, the murderer, was arrested and is in hospital suffering from injuries self-inflicted in a suicide attempt.

The amateur gardener was showing the beauties of his greenhouse. "This," he said, pointing to a flower, "belongs to the petunia family."

"Does it?" commented the sweet young thing. "I suppose you're minding it while they are away."

11 a.m.—PUBLIC WORSHIP and SENIOR SCHOOL.

ST. LUKE'S CHURCH NOTES
Rev. A. S. Partington, B.A., Rector.

Services Sunday next:
11 a.m.—Morning Service.

HOME FROM THE WEST

Mr. J. W. MacIntosh and his daughter, Mrs. (Capt.) Sprosen, returned Saturday night from a month's trip out West, going as far as Cranbrook, B.C., where Mr. MacIntosh's son Stewart and his family live. Another son, Dr. Charles MacIntosh, is located in Pincher Creek, Alberta, and his daughter, Mrs. Hall, in Drumheller, Alberta. They enjoyed a short visit with each of them and saw much of the country there. Mr. MacIntosh has a sister in Calgary, with whom they stayed for a few days. In Winnipeg they were met by Mr. and Mrs. Harold McCulloch, who moved out there from New Glasgow a few years ago. They had a very pleasant visit with them and almost every place they stopped they met friends and their days throughout the trip were crowded with interest and full of enjoyment.—New Glasgow Free Lance.

SWEET

English version:
Mrs. Kent—Is your tea sweet enough, Mr. Southern?

Mr. S.—Well, not quite, Mrs. Kent.

Mrs. K.—Here's a lump of sugar.

Irish version:
Mrs. O'Brien—An' how's yer tea, Mrs. Murphy?

Mrs. M.—Sure, it end be da'en w' some more sugar, Mrs. O'Brien, thank ye.

Mrs. O.—Here's the bowl, help yourself.

Scotch version:
Mrs. McDonald—What's wrang w' ye, Mr. McPherson, y're no drinkin' yer tea?

Mr. M.—It's no sweet eneuch, Mrs. McDonald.

Mrs. M.—Ha'e ye stirred it?

He: "It certainly is getting dark in this parlor. Gosh, I can't even see my hand in front of me."

Blairmore Miss: "That's all right, I know where it is."

Loquacious Barber (commencing the haircut): "Did I ever tell you about that time when I— (resumes business) —"Want it short, sir?"

Literary Customer (wearily): "Yes, a mere synopsis will do."

For Short Term Marriages—Wedding rings are much smaller and thinner than they used to be, comments a woman novelist. The old-fashioned wedding ring, of course, was made to last a life-time.

"Have you heard about the women of Blairmore forming a secret society?" she asked.

Hubby laughed. "That's good, that is," he said. "Why, women don't know how to keep a secret."

"Oh, but this society isn't going to keep secrets—it's going to tell them!" she replied.

Father: "Not a very good report, my boy. Why can't you do as well as Billie Smith? I hear he is top of your form."

John: "Yes, father, but you must remember that Billie comes from a very clever family."

COMING WEST

The following is an editorial taken from the Nanton News of June, 1903, the initial issue of that weekly. The words of the editorial carry with them a vivid picture of those high and far-off times when hopes soared high and when fortunes lay ahead:

"The great rush, as it might be termed, into the western country, is now at its height and the amount of immigration this spring broke all records."

"This year there are doubtless the usual number of speculators, but they are simply lost in the crowd of actual settlers. People are pouring in from all quarters of the world, and they are coming to stay. Trains coming west are crowded and the incoming tide embraces not only all sorts and conditions of men, but individuals of all ages from the grey beard to the infant in arms. They are coming, as the Israelites of old went down into Egypt 'with their wives and little ones.' It is gratifying to present settlers to notice the number coming from England and the United States. For a long time English-speaking immigrants were in the minority, but the influx of this class promises in future to far exceed those of other nationalities. Advice from England state that berths cannot be found on steamers for all who wish to come, and the number of arrivals from the south have had to be doubled to bring the people. As a result of this, new towns are springing in all directions. Although land has advanced in price, there is a general feeling that it is yet much below its value. The cry is, still they come; and echo answers, still there is room."—Ex.

WHAT WOULD YOU DO?

Copied from the "Over The Top Cup" column of the Toronto Star: "Would you see a friend eat a big fat potato bug and not do anything about it? . . . We know a girl who sat at a luncheon party the other day and saw a friend, sitting directly across from her, cut a piece of lettuce off, wrap it neatly around a big potato bug which was crawling under the lettuce, and eat it with apparent relish. . . . The girl—well—could have stopped it by speaking quickly and loudly, but she knew it would embarrass her hostess frightfully and probably prevent all the other guests from eating their salad. . . . So she held her breath and saw the potato bug disappear. . . . The girl who ate it evidently thought it was just another piece of celery; the other guests, not knowing anything about it, calmly ate their salads; and the girl—who saw was the only one who really suffered, because she simply couldn't go for her's. . . . What would you have done?"—The Canadian Echo, Warton, Ontario.

BREVITIES

"If some people were to think twice before speaking, they would never say anything."

"There is only one way of knowing the truth, and that is by proving it in a practical manner."

"Success is nothing more or less than surrounding your ambition with enthusiasm and endeavor."

"Always look on the bright side of things, but if you are buying them, it's as well to look on both sides."

"The twelfth commandment is this: Don't take yourself too seriously."

"A reputation of fifty years' standing can be ruined by one hour's conduct."

"A germ is a germ which gets to the gas-meter and causes rapid consumption."

"A man can easily save twenty years of his life by studying the experience of others."

"If you will work for others as you would like others to work for you, you'll never be out of a job."

"All real success is built on failure. Those who are not discouraged by discouragement are the only sure winners in any undertaking."

MAKE ME A MAN

(By O. Lawrence Hawthorne)
Lord, give me the strength of the pioneer
And the faith of his hardy soul
Provide me with courage to persevere
Make me fight till I reach my goal.

Let wealings indulge in a sheltered life
Where they curse when their luck goes bad,
But fit me for battle with storm and strife;
Give me brawn like my forefathers had!

I want to be known as a man who wins.
As a fellow with nerve and pluck;
Who finishes everything he begins,
And as one who can whip his luck!

STOP "KICKIN"

Now there ain't no use to worry
and there ain't no use to fret
'Cause the things you've been

expectin' haven't happened yet.
There's no use to be complainin'
and be always in a stew
'Cause the other feller's gettin'

what you think belongs to you.
Why life's things is distri-buted
in the funny way they is

Is away past my explainin' and
it's really not my biz
For the one who distri-butes

them, they say is mighty wise.
And knows just what he's adoin'
tho' he does live in the skies,
So 'twill be a darn site better

not to grumble and complain
'Cause we wanted pleasant weather
and instead we got the rain.
Rain was needed by some feller

for his crops and for his hay,
They'd dried up and he'd been busted
if we'd had our bloom in the
A much better plan is this one—
be contented all the while—

Work your darndest while you're
workin'—always have a happy
smile.

You'll be gettin' all you're wantin',
if you want it hard enuff.
Other ways of livin's lonesome—
and the road is mighty rough.

—Spencer Michael Free, M.D.

COAL AS PIG FEED

Not the least important of the many uses of coal is its utility as feed for pigs. By the use of minerals, gains in the growth of pigs are more rapid and the cost of production lowered. The following mineral mixture for pigs is recommended by the Swine Division, Dominion Department of Agriculture: slacked coal, 76 lbs; salt 20 lbs; air slacked lime or ground limestone, 3 lbs; and sulphur, 1 lb. This mixture may well be provided in boxes available to pigs at all times.

WORLD'S GRAIN EXHIBITION AND CONFERENCE · JULY 24th to AUG. 5

A WORLD EVENT Brought Right To Your Front Door

Never before has the privilege of playing host to the nations of the world been accorded to Western Canada—and never again will a gathering of such world-wide importance be staged so conveniently for Canadians of the prairies.

PARTICIPATED IN BY
Over Forty Nations, States & Provinces

Here representatives from all parts of the world will gather to show what they grow and share what they know in the magnificent 35½ acre, quarter-million dollar Grain Show Building. Exhibits and discussions that no one should miss.

NOT MERELY A GRAIN SHOW

Held, as it is, concurrently with the Provincial Exhibition, one will see here the finest live stock, agricultural, industrial and farm machinery exhibits ever displayed in Western Canada. . . . Wonderful commercial, railway and government exhibits that have taken months to set up and many of which were previously shown only at the famous Wembley and Argentine Exhibitions. . . . and those visitors seeking holiday entertainment will find grandstand attractions and amusements features seldom seen outside the greatest cities of the world.

All Aboard for a Glorious Holiday

No Westerner should miss the "trip around the world" offered by an inspection of the grain show building. Special rates on all railways. **Plan NOW** to attend this great world-event.

HILLCREST HAPPENINGS

(Received too late for last issue)

July 12—Jean Cruickshank is visiting with Mr. and Mrs. Stevenson at the North Fork.

Douglas Carter motored from Great Falls on Saturday and returned on Sunday, accompanied by his sister, Mrs. Mackenzie.

C. Derole, of Vancouver, is visiting at his home here.

Mrs. Lesson has been confined to her home through illness for the past few weeks.

Doris Bamforth motored to Saskatchewan with Mr. and Mrs. A. Blackie, of Fernie.

Mrs. G. Mansell and family left on Tuesday afternoon for England.

Mrs. T. Hale and daughter Mary, of Lethbridge, were Hillcrest visitors this week.

Mrs. S. Rossi is a patient in the Fernie hospital.

Mrs. E. Cressman and son Grey are Calgary visitors for the Stampede.

Gwyn Richard motored to Calgary on Sunday.

Dorothy McEwen, of Calgary, is visiting at the home of Mr. and Mrs. P. Salt.

D. McNeil returned last week to New Jersey.

Master Ronnie Gorton entertained a number of his friends at a picnic at McLean's ranch on Thursday, the 6th, his seventh birthday. Games were played, races run, and after an enjoyable lunch, the youngsters returned, everyone having had a wonderful time.

July 19—Mrs. L. Fumagalli and daughter Mary were Calgary visitors this week.

Mr. and Mrs. W. Williams are rejoicing over the birth of a daughter.

Mr. and Mrs. G. E. Cruickshank motored to Calgary on Thursday last.

Mr. and Mrs. J. Mackie left for Vancouver on Saturday evening last.

Mr. and Mrs. W. Adlam motored to Spokane this week.

Mr. and Mrs. J. Ironmonger returned from the coast on Saturday.

Joe Koutsky and Joe Ulrich left for Crossfield this week.

Mr. and Mrs. Blackmore, of Saskatchewan, were visitors at the home of Mr. and Mrs. G. Thornton on Thursday last.

R. G. Drinan, of Edmonton, is a Hillcrest visitor this week.

Leslie Stutchberry, of Lethbridge, is visiting with his grandfather, Mr. W. Hutchison.

Mr. James Tutt, of the Hillcrest station, returned from the coast on Sunday.

Fred Bozenok, of Coleman, was a Hillcrest visitor last week.

Roy Anderson returned to Drumheller last week, after a short vacation in Hillcrest.

D. Kyle was a Calgary Stampede visitor last week.

Annie Lipnicka was a Calgary visitor last week.

Mr. and Mrs. J. Penn and family motored to Lethbridge on Saturday.

May Dudley, accompanied by Mr. and Mrs. Prescott, of Bellevue, motored to Spokane this week.

Mr. and Mrs. P. Salt motored to Calgary this week.

Roberta Thornton is visiting with Mr. and Mrs. W. Stevenson at the North Fork.

Mr. and Mrs. C. Carlson and family are camping in the South Fork district.

Mrs. R. Makin is visiting with Mr. and Mrs. R. Price in Calgary.

Mr. and Mrs. R. Crichton and daughter Peggy motored to Calgary on Monday.

Misses Elsie and Doris Bamforth returned from Saskatchewan on Saturday last.

The Hillcrest football team lost to Michel on Sunday by 6-1.

Master Jimmy Welsh is visiting with his sister at Bow Island.

Mr. L. Altham was a Hillcrest visitor this week.

Mrs. N. Bamforth, of Watrous,

Saskatchewan, is visiting at the home of Mrs. G. Bamforth.

Vincent Casagrande is visiting at the North Fork.

J. Calderwood returned from his vacation to Calgary on Thursday last.

Mrs. J. Leigh and daughter Verdon are visiting at the home of Mr. and Mrs. J. Gorton, junior.

Mr. and Mrs. W. Makin and family are camping at the South Fork.

The Hillcrest Fish and Game Association is holding its annual picnic and competition on Sunday, July 23rd.

The local Boy Scouts are in camp at McGillivray Creek, Coleman, under the charge of Scoutmaster A. Mark.

Myrtle Dowden is visiting with her grandmother.

COWLEY HAPPENINGS

Mr. and Mrs. Jim Smith, junior, are receiving congratulations upon the birth of a son on July 12th, in the Pincher Creek hospital.

Mrs. "Heck" Lemire is visiting relatives in Macleod this week.

Mrs. G. Regaux, of Pincher Creek, accompanied by her three children, is paying a visit to her parents, Mr. and Mrs. Charles McKerral.

Mr. and Mrs. T. W. Hand, of Hamilton, Ontario, are visiting with relatives and friends here.

W. W. Berry has moved his family back to Bellevue, after residing in Cowley for the past several months.

Miss Irene Wells, of Bellevue, is a holiday visitor with her aunt, Mrs. Robert Littleton.

P. Burns, of Calgary, was a recent business visitor to the district, in connection with his interests in the Walrod Ranch.

The Ladies Aid of the United church held their regular monthly meeting at the home of Mrs. Richard Coates on Friday afternoon. Among some of the recent activities of this organization was making a quilt for a hospital.

Mr. Kirkpatrick, popular radio singer of Calgary, is at present spending a few days visiting at the Easterbrook ranch.

Mrs. F. A. Tustian is paying a visit to her daughter, Mrs. D. M. Isaac, at Calgary.

A game of baseball between the Olin Creek and Cowley teams was played here on Sunday afternoon, resulting in a win for Cowley by 14 to 3. Players were: Olin Creek—L. Wright, A. Boucher, A. Manfort, R. Rhodes, G. Legarde, F. Verquin, E. Verquin, R. Burles and M. Dumont. Cowley—H. Pratto, B. Potapoff, A. Dambols, H. Smyth, A. Murphy, M. Black, C. Dambols, J. Floyd and E. Franz. The game was umpired by E. Franz and was attended by a large crowd of spectators.

Owing to injuries received while driving in a car, Mrs. Ed. Cowin is confined to her bed, and is under the care of a doctor and nurse. The accident happened while passing over a culvert, when Mrs. Cowin's head struck the top of the car, giving her body a twist and at the same time breaking a small bone in her back. Although her condition is serious, she is progressing favorably, and should be around again in a few days.

Mr. Cowin, who was at the wheel, received quite a jar also, but escaped without injury.

The Lundbreck and Tanner girls' softball teams met on the Cowley sports field for a game of softball on Saturday afternoon. Both teams entered the contest chuck full of pep, and as the game progressed play was pretty well balanced up to the seventh inning, with Tanner in the lead 4-3; but in the eighth inning, Tanner went to pieces, allowing their opponents to make five more runs, which gave them the game to the tune of 8-4. Players: Tanner—Dora Day, Blanche Smyth, Verda Cleland, Ida Smyth, Edna Betts, Bernice Zeigler, Nellie Wright, Ellen Smyth, Marjorie Cleland and Ruth Finch. Lundbreck—"Pat" Smith, Jean Carswell, Violet Penn, "Tommy" Madden, Aileen Emmerson, Rhona Grove, "Billie" Smith, Nola Nelson and Miss Larned. Father O'Dea umpired the game.

The community was shocked on Monday evening, when news spread of the death of Mrs. George Penn, of Lundbreck, which occurred while watching a ball game that was in progress on the Jim Smyth place, near the river, north of here. Mrs. Penn, to all appearances was in average health, and at the time she was stricken was standing among a crowd of fans, holding her infant grandson in her arms and chatting with women around her, when she collapsed and fell to the ground suddenly. Some brandy was administered immediately, when she rallied for a moment, then passed away. The funeral service took place in the Anglican church, at Lundbreck, yesterday afternoon, after which the body was sent by the eastbound train to Vancouver for burial. Besides a devoted husband, Mrs. Penn leaves two daughters, Miss Violet, at home, and Mrs. Hermiston, of Lundbreck, and one grandson to mourn her loss. Deepest sympathy is extended to the bereaved ones.

A large crowd was on hand when the married men of Spring Creek played a return game of softball with the hen-pecked of Cowley on the local grounds on Wednesday evening last, with some very good play displayed when the teams got warmed up. The lineups were as follows: Spring Creek—J. Evans, p; B. Morin, c; B. Bennett, 1b; H. Gunn, 2b; N. Cox, 3b; Miller, rf; C. Fordyce, lf; J. Gunn, ss; R. Bent, ls. Cowley—Father O'Dea, p; R. Alexander, c; C. J. Bundy, 1b; M. A. Murphy, 2b; A. Tustian, 3b; P. Patterson, rf; L. Lemire, lf; F. Tustian, ss; A. Freeman, ls. Umpire, H. Pratto. During the early part of the game, play kept pretty well balanced, when at the end of the seventh inning the score broke even. In the eighth, Cowley scored six more runs, putting them well in the lead, with the final score being 18-12 in favor of Cowley. After the game, the crowd was invited to the parish hall, where tables were spread and some sixty people sat to an appetizing luncheon, prepared by the Cowley ladies.

WONDERFUL LEE LAKE

(From our own Correspondent)

Mr. and Mrs. Tom Handyside, who are spending the summer with Mrs. Parker, left this morning to take in the stampede and exhibition at Lethbridge.

The Boy Scouts and leaders, numbering twenty-seven, from Retlaw and Enchant, have been in camp here for the past seven or eight days.

Harry Harrison, of Hillcrest C.P.R. station, has joined his family to spend his holidays in their new summer cottage on the edge of this beautiful lake.

Mrs. Fred Padgett and family, and Mrs. Hill, of Bellevue, are camping here.

Mrs. Charlie Ritchie and family,

of Bellevue, have arrived for the summer, and are nicely settled in their two-room cottage.

All campers and visitors are enjoying the beautiful weather and the warm lake water to bathe in. The clear atmosphere gives one an exceptional opportunity to enjoy the mountain and foothills scenery.

A large picnic party from the North Fork spent last Sunday here.

The canoe on the lake has been one added attraction.

DELAY IN BECOMING NATURALIZED ASSAILED

Opinions of foreigners who reside at length in Canada before applying for citizenship were voiced by Chief Justice Simmons at Calgary on Tuesday, during his consideration of an application of a resident of twenty-three years standing for naturalization.

His Lordship declared: "You could not do that in the United States. If you stayed in that country for six months and did not make any move to become naturalized, you would be told to get out. You haven't been playing fair to the country from which you have been getting your livelihood."

PINE MOTH BORERS IMPORTED

One of the strangest shipments ever conveyed by the Canadian National express from England was 41 boxes of pine moth borers, all in the coconut stage. The larvae are carrying with them a parasite with which they were infected by the Imperial Institute of Entomology, at Fochun Royal, England, and it is this parasite which is of the greatest importance, as it is the intention to have these parasites and their progeny transfer themselves to the Canadian relatives of the pine moth borer to the benefit of pine trees in the Dominion. The larvae of the pine moth borer bores into and feeds on the leader shoots of pine trees, retarding growth, preventing straight boles and largely reducing the trees' value and beauty. The moth is one of the greatest enemies of reforestation, being known to infect as many as 80% of the young trees.

SKUNKS

Well, what next?
The latest fad, we understand, is having skunks for pets. We have actually heard that several young people in town and others not so young have adopted the pretty creatures as their constant companions. There is certainly no accounting for taste.

Who knows? The next thing we may hear is that the ultra-modernists may be carrying the little dears around in their muffs or leading them on leashes, with pink ribbon bows about their necks.

So fads and fancies come and go. But isn't it the bunk, For mighty man or modest maid, To pet a "dirty skunk"?

"Home Brews"
constitute a menace to health. There is no substitute for a properly brewed and properly aged Lager Beer.

A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gainsaying the fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and world purchasing power, memories of old crises hedge the inflationist suggestions with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of uncontrolled inflation. They remember the disastrous sky-rocketing of commodity values in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations, involving reckoning in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation to them means printing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they hesitate to venture again from the gold anchorage.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of frenzied reckoning. Britain hazarded a return to gold, and bled herself white in the process of maintaining the standard. So much so that when the country eventually was forced off gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a policy designed to raise commodity price levels and revive moribund industry, has seen fit to release the dollar from gold, and is not to be persuaded to hitch it to any other monetary standard until experience has demonstrated the proper level at which it should be pegged for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London news would indicate that, whereas Britain abandoned the gold standard and apparently was allowing sterling to find its own level, in reality the pound, for some time, at least, has been maintained in a position of some relationship with the French franc. Some measure of control, therefore, has been exercised in Britain and, the result, there has been no appreciable disequilibrium between money wages and commodity values. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, this position having been reached, a strenuous effort will be made to prevent the inflationary trend from going on enough to negative the good done.

The controversy before the members of the Gold Bloc, and those adhering to the Sterling-Dollar group had the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the test, Britain threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward these countries rather than to the continent of Europe for the trade opportunities essential to her economic wellbeing. London dispatches have made it abundantly manifest that the British people are becoming more wedded to the idea of an Empire Economic unit, to the extent that such an idea is tenable. Indeed, at one crisis in affairs of the conference, when definite attempts were made to force its adjournment, there were many proponents of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious deduction to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British opinion is emphatic for practical application of the Ottawa agreements and for their extension. Canada should not hesitate to capitalize this favorable attitude; and, with prices of the primary products moving upwards, the stage is being set for a real revival.

Costs Little To Operate

Small Airplane Weighs Less Than Thousand Pounds Loaded

One of the smallest airplanes built, a two-cylinder Aerocraft, is proving its wings in high altitude flying at the Western Airport at Denver, Colo., more than a mile above sea level. The plane weighs less than 1,000 pounds loaded, and can be operated for less than \$2 an hour, its owners say. It develops a maximum speed of ninety-five miles an hour and maintains a cruising speed of eighty-five miles per hour. It burns only two and a half gallons of gasoline an hour. The craft is a two-seater cabin monoplane.

Would Be Some Crow

No one in the farm district community of Shenandoah, Iowa, is unfamiliar with a "rooster's" crow at dawn, but it was not until recently that any of them had heard 11,000 roosters crow at once. Placed in cars for shipment to market, one of the chautauquers raised his voice to greet the day and most of the other 11,000 joined in with him. The din brought many startled residents out of bed.

Prince Likes Scotch Costume

Prefers Kilts When Full Dress Uniform Is Required

The Prince of Wales, who deputized for his father at the last levee of the season at St. James's Palace, is very fond of wearing the kilt on such occasions of State, which demand full dress uniform. The reason for the Prince's preference is simply that he does not hesitate to caparison himself in his Wellington boots, and tight trousers, which he wears as Colonel of the Welsh Guards, gives much less comfort and freedom of movement than the loose kilts he wears as Colonel-in-Chief of the Sutherland Highlanders.

A searchlight resembling a cannon, mounted on a motor truck, has been constructed by a British military inventor to project words and time from a transparent clockface on the clouds.

At the end of the fiscal year 1931-32 there were in Saskatchewan 838 wards in free or wage foster homes; 84 in paid foster homes, and 29 in shelters.

Bowel Complaints of Children During the Summer Months

Mother should look well after their children during the hot summer months. Despite the fact that children may be seized, at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has received the endorsement of leading Canadian medical authorities. For 88 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side.

Manufactured only by The T. Millburn Co., Ltd., Toronto, Ont.

A Martyr To Science

Doctor Pierced His Body To Test Pain Sensations

How a doctor suffered self-inflicted pain by piercing himself to the bone with a sharp needle was revealed at the James Mackenzie Institute for Clinical Research at St. Andrews, Scotland.

This martyr to science, Dr. David Waterston, narrated to the Institute how he decided to make experiments on himself, as it was vitally essential to have training in the analysis of sensations.

His experiments were to discover to what extent pain was felt when different parts of the body tissues were irritated from outside.

Dr. Waterston pierced himself with a sharp needle until he reached the bone. He made observations as he reached muscle, veins and arteries, to discover the extent of the pain he felt.

At one point, when he had penetrated an artery in his arm, the pain was so acute and sickening that he almost fainted. Undaunted, he continued his experiments.

Dr. Waterston's conclusions bring a new theory for the solution of the problem which has perplexed mankind since the world began.

Former theories stated that pain was due to over-stimulation of the nerves which existed for the purpose of sensing touch. Dr. Waterston claims that there is an entirely distinct branch of the nerve system which exists solely for the purpose of perceiving pain.

These nerves do not reach to the surface of the skin. A needle can be thrust through the epidermis and "touch-nerves" merely convey the sensation that something is in contact with the skin.

Further insertion of the needle at once produces a feeling of pain.

The "Island Of Fright"

Noted For Thrilling Stories Of Shipwrecks and Rescues On Brittany Coast

A rocky island off the Brittany Coast where rock roads lead to villages with houses of stone was vividly pictured to a Montreal audience by Marie La Franc, noted French authoress. She described the boat trip from Brest to the island and told of the landing place, a perpendicular ladder fast in the solid rock. On the shore, she said, women wait for the boat, standing motionless like albatrosses of stone. Many vertical rocks and many lighthouses mark the shoreline, and inland stretch monotonous miles of grassy rock on which thousands of sheep graze. Blue window frames of the houses lend the sole relief to the gray of the rock and the green of the grass.

Originally the island was named the Island of Fright because of the continual changing mists she believed, and also because of the fact the impenetrable rocks formed a safe hideaway for pirates. Tales of piracy belong to another day and the island is now noted for thrilling stories of shipwrecks and daring rescues by the Ubahut folk.

The womenfolk with their wild, wind-tossed hair she described as proud and upright. The menfolk are strong and simple seamen who visit many a French and foreign port but always marry a "Quenennette."

Great Authority On Crime

Sir Erskine Blackwell Retires After Long Service As Adviser

Sir Erskine Blackwell, prison reformer and police authority, has retired from his position as legal assistant-under-secretary to the Home Office, he having reached the age limit of 65 years.

It is said that no man in the United Kingdom is possessed of a greater insight into the mind of the criminal, or has so extensive a knowledge of the methods of the criminal fraternity than Sir Erskine. Despite a stern demeanor, he has been a generous friend to the criminal type, and his good, but to the hardened criminal who makes his living by crime he has proved a positive terror.

He has spent many anxious hours at the Home Office reading and considering reports from convicted murderers and other criminals, for it was his duty to advise the home secretary on points arising on these matters. Every petition for many years past has gone through his hands. Born at St. Andrews in 1863, he was called to the Bar at Lincoln's Temple in 1892. He became assistant-under-secretary to the Home Office in 1913.

In the last two years 403 women have been appointed magistrates in London.

Many a bachelor "gives up good quarters to get a better half."

Grain Elevators Busy

Rise in Wheat Prices Brings Changed Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time. Hon. Robert Weir, Minister of Agriculture, stated on his return to Ottawa. Mr. Weir has been for several weeks on a visit to his constituency of Melfort, Sask., and also visited much of the surrounding country.

The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 60 cents a bushel and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said.

Some 50 municipalities have been badly stricken by the grasshopper plague, Mr. Weir said, and assistance would have to be given them.

Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

The Morning Post states: Timber Distributors, Limited, a group of British importers, announced in a letter to British firms interested in purchasing timber that they would import 900,000,000 board feet of Russian lumber during the coming navigation season.

The newspaper said: Timber Distributors, whose previous plans to import Russian wood were stopped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 15 shillings to the contract price for the lumber to cover inconvenience caused by the embargo.

Even with this addition, the Post quoted the firm as saying, the price in the British market would be far below anything with which Canadian timber interests could compete.

Completes Cross-Canada Flight

Secretary Of Clubs Finds More Flying Being Done In Cities

George M. Ross, secretary of the Canadian Flying Clubs Association, landed at Sea Island Airport, Vancouver, completing a flight across Canada during which he visited all the Aero clubs en route. He made the final leg from Calgary in eight hours, flying the Moth 'plane' presented to Major-General J. H. MacBrien, president of the aviation league, several years ago. It is the Moth's fourth visit to Vancouver and its fourteenth cross-Canada flight. It has done some 86,000 miles.

Mr. Ross found more flying is being done in nearly every city. "Fewer Canadians are going to the United States for their aviation training," he said. "In some parts of the east, in fact, the trend is the other way."

Railroad Station Nursery

Newest Innovation Established In France Will Be Free

A nursery is the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves Brittany and La Vendee. From 40 to 50 babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be imitated in the principal stations of the State Railways. If baby wants a bath, a change of clothing, a bottle of milk, an hour or two of sleep, all this will be available at the nurseries, and all of it will be free.

It has been discovered that bees communicate by performing a kind of dance. Those with whom they communicate generally do the same.

Soured On THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

No Calomel necessary
Many people who feel sour, sluggish and generally unwell, make the mistake of taking salts, or mineral water, laxative candy or other purgatives. These will only burn the bowels and spoil the liver.
If you are tired and want to wake up your liver, take **WATERBURY'S** every morning. It is the only safe, reliable, and effective way to keep your liver in good condition. It is the only safe, reliable, and effective way to keep your liver in good condition. It is the only safe, reliable, and effective way to keep your liver in good condition.

Cars Are Practically Immune To Lightning

Safest Place For Motorists If Storm Overtakes Them

If you are driving along the highway when an electrical storm comes up, and you seek a nice safe place to stay until the storm passes, just take the advice of experts, and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer in his car during an electrical storm than in his home. Come to think about it, there are mighty few cases on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out in electric storms, particularly in our larger cities.

Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 150 delegates, representing 22 counties, will assemble in London for the three-day centenary celebration of the Entomological Society of London, England.

Economic entomologists in every country of the Empire are now fellows of the society, and in proof of the value of their work two outstanding successes may be instanced—the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire coconut industry of the Fiji Islands from a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasitic insect. The world's hope of controlling the migratory locust in Africa and Asia is also dependent on the economic entomologist.

Wonderful Trip For English Schoolboys

Have Left Manchester On Holiday Trip To Morocco

Twelve pupils at the Manchester grammar school, who have left for a holiday trip to Morocco, will be the first Europeans to inspect the hitherto forbidden city of Tchezewen. Permission has been granted to them on account of the school's friendly relations during previous trips with the Sultan and high officials.

In addition to exploring many little known parts of Morocco, the boys will also act as ambassadors for the Lancashire cotton trade. They are taking with them samples of Lancashire cloth, in order to impress the people of Morocco with its quality. As a result of doing this on previous visits many of the Moroccan hotels have purchased large quantities of such Lancashire goods as tablecloths and bed sheets.

Boom In Construction

Twenty-Six Cities Plan Building Projects Which Will Total \$160,000,000

Twenty-six cities in Canada expect shortly to undertake engineering and building projects amounting to \$160,000,000, according to a survey made by the national construction council. In all, questionnaires were sent to 64 centres, and it is expected the final figure will reach \$350,000,000.

Twelve local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and research work in the various provinces for the national body.

Best Container For Cream

A well soldered plain-bottomed tin can, about eight inches in diameter and 20 inches deep has been found by a dairy farmer to be the best kind of vessel in which to hold cream. It is easily cleaned and convenient to handle. If cream is held in earthenware crocks that have in any way become chipped, an undesirable flavor may be imparted to the butter.

Had New Experience

Canada's Governor-General has met with a new experience. He attended his first baby clinic. Doctors examined 26 hasty youngsters while Lord and Lady Bessborough looked on. The clinic was part of the program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

Right inside your pipe bowl... there's where Ogden's Cut Plug tells the story of smoking pleasure and it's a serial story, too—every pipeful is a chapter of enjoyment... complete in itself... told in a language you'll always understand. The more particular you are about pipe tobacco the more you'll like Ogden's Cut Plug. You can't help but like it... it packs right... lights right... burns right... in your pipe!

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers.

Germans Accept Nazi Salute

Polite Greeting Is Very Similar To Fascist Gesture

The Nazi or Fascist salute, with the right arm uplifted, is slowly but surely taking hold among the German masses.

While it has not yet replaced the handshake or hat-lifting as thoroughly as has the "Roman salute" in Fascist Italy, it is becoming more and more generally accepted as a polite form of greeting.

The Hitler salute, as at present practiced by non-Nazi civilians, still lacks the snap and sweep of the Mussolinian gesture.

The Italians shoot the right hand, palm outward, well above the head, hold it there for a brief dramatic second, then drop it sharply.

In Germany, however, most of the salutes are content to bring the right forearm up from the elbow to the level of the head and then lower it slowly.

Woman Wins Fellowship

Graduate Of Toronto University To Conduct Research In England

A Royal Society of Canada fellowship to be held at Newnham College and the Botany School, Cambridge, has been awarded to Dr. Dorothy F. Forward, a graduate in Arts of the University of Toronto, who holds also the post-graduate degree of M.A. and Ph.D. The work for which she was awarded this fellowship is concerned with the physiological resistance of wheat plants to attacks of rust. During her post-graduate studies in the department of botany she held a fellowship of the Ontario Research foundation. Dr. Forward expects to proceed to England this summer.

PLEA MADE FOR ACTION TO AID WHEAT PRICES

London, Eng.—Prime Minister J. Ramsay MacDonald appealed to wheat producers and importers alike at a special meeting to get together in an agreement for co-operating wheat production and consumption with a view to increasing the prices of the world's principal staple commodity.

He insisted not only upon an agreement but upon a "prompt agreement."

As a consequence of the appeal the "big four" producers, Canada the United States, Australia and Argentina, were hopeful the Danubian countries would recede somewhat from their insistence upon a large export quota and approach the 45,000,000-bushel figure assigned them by their share in world exports by the big four.

A French delegate proposed the negotiations be thrown into the hands of the committee of the economic commission of the World Economic Conference, particularly insofar as co-operation of importing countries is concerned, but this move was rejected.

In any event the long-sought international agreement for balancing production and consumption of wheat seems likely to be one of the first fruits of the international discussions in London, an agreement of paramount interest to Canada which, in face of the dwindling program of the World Conference is battling for concrete results regardless of whether these are obtained inside or outside the conference.

With the problem of cutting production to fit the demand having practically solved itself at the moment western Canada turns chief attention to the plan for a quota system of exports from the chief exporters. The London discussions have embraced such a plan, the idea being to fix the price of each leading producer not on the basis of figures of the crop year but on an average of the exports over a period of three or five years.

In this connection the London regulations read, with interest, the statement of George W. Robertson, secretary of the Saskatchewan Wheat Pool, this week that "it would appear a bushelage rather than an acreage basis gives the best hope of success in bringing about a better relationship between wheat production and consumption."

The French government has sought higher prices by giving wheat growers \$8,000,000 in advance to guarantee prices.

Farmers are asked to declare in advance their intended acreage, millers to report stocks on hand at the beginning of each season. These figures and the general outlook are to be studied under a bill just adopted by a board of farmers, dealers and a government representative with power to control the market.

Wheat Output Reduction

Matter Discussed At U.F.A. Meeting In Edmonton

Edmonton, Alberta.—Curtalement of wheat production was the main topic of discussion at the session of the U.F.A. members' annual get-together meeting in the main chamber of the parliament buildings here. The general question of crop conditions in relation to the economic situation, was also considered in a preliminary way.

The majority of the members taking part in the discussion expressed agreement with the action taken thus far in respect to reduction of wheat acreage. In view of the recent improvement in price levels, however, no decision has yet been reached as to what measures of curtailment will be necessary.

Fodder relief in the southern and eastern parts of the province will likely be needed to some extent, it was believed by members from these districts, and this will be one of the matters to be further discussed.

Gold Production Higher

Ottawa, Ont.—An increase of more than 600 ounces was shown in production of gold in May, when 237,661 ounces were produced, as compared with 227,017 in the previous month, said a report issued by the Dominion Bureau of Statistics. Production for the first five months of this year totalled 1,196,512 ounces as compared with 1,230,294 for the same period in 1932.

W. N. U. 2003

Pool Elevators

Saskatchewan System Shows Increased Business

Regina, Sask.—Handlings of the Saskatchewan pool elevator system showed an increase during the crop year 1932-33 over the crop year 1931-32.

The company will presently make its final payment in full to the liquidators of the Saskatchewan Co-operative Elevator Company on account of the purchase of that elevator system and also the mortgage to the provincial government on the same account. The total amount involved is close to \$2,000,000.

These statements were made by L. C. Brouillette, president of the Saskatchewan Wheat Pool, at the Wheat Pool committee convention of contract signers of the Regina area recently.

Mr. Brouillette said further that the pool would sell this fall make the first payment on principal under the agreement with the government on the 1929 over-payment guarantee.

Operating policies for the crop year 1933-34 are to be the same as at present. The grower may either deliver to a seasonal pool or to the open market. He spoke in favor of an international export quota plan, which he said the organization now definitely favored.

He was convinced that acreage reduction by legislation was impracticable. He stressed the value of a grain reserve carried on farms, which would be the essence of the grain quota scheme.

Referring to the World Economic Conference at London, Eng., he expressed the opinion that if it accomplished nothing else than to bring about some measure of understanding as far as the world wheat problem was concerned then it could be described as a success.

Ten Ships Still Unsalvaged

No More Vessels To Be Raised From Scapa Flow

London, Eng.—The last of the German warships to be raised from Scapa Flow, the battle-cruiser "Von der Tann" has been taken to Rosyth to be broken up. This ends the greatest feat of salvage ever undertaken.

It was on June 21, 1919, that the German high sea fleet was scuttled. Eleven battleships, 13 cruisers and 50 destroyers foundered, mostly in deep water. Salvage work was started in 1924. Twenty-two ships, including the 28,000-ton battleship, "Hindenburg," have been raised and taken to the break-up yards. Ten ships still remain under water, but it has been decided not to raise them.

Whale Attacks Schooner

Crew Of Small Fishing Boat Had Narrow Escape

Pope's Harbor, N.S.—Captain Howard Daye and the crew of the fishing schooner "Evelyn M. Young" made port safely after a thrilling encounter with an enraged whale off the Nova Scotia coast.

The little vessel was hoove to 15 miles off Pope's Harbor when a 50-foot whale attacked at night. The whale slashed into the vessel and the blow sprung the schooner's seams. Water started to enter the hold.

Captain Daye turned the "Young" for Pope's Harbor and made port before morning. The vessel was in a sinking condition and had to be grounded.

Powder Stores Robbed

Winnipeg, Man.—Believed to have been perpetrated by a gang of safe breakers, seeking material with which to crack strong boxes, City of Winnipeg's powder magazine at Stony Mountain, Man., has been broken into and a large quantity of dynamite, fuses, caps, and detonators stolen, it was disclosed Wednesday. The crime is believed to have taken place last Thursday night.

Nurses' Convention

Paris, France.—Thirty-two nations are represented among delegates at the international congress of nurses here this week. Canada has sent 135 delegates, Africa 25 and the United Kingdom 300, but there are no nurses from Soviet Russia. Altogether, 2,000 nurses are attending.

Nova Scotia Elections

Halifax, N.S.—Nova Scotia's provincial general election will be held on Tuesday, August 22, Premier Gordon S. Harrington announced last Wednesday night, with the approval of the lieutenant-governor. The present general assembly will be dissolved Thursday, and writs issued for the election. Nomination day is Aug. 25.

Canadians Welcomed

Rudyard Kipling Addresses Touring Authors' Association

London, Eng.—Canada, her glorious past and her wonderful future, the great inheritance she has had from the mother country, formed the theme of a vividly-phrased address by Rudyard Kipling when he made one of his few public speeches to welcome the touring party of the Canadian Authors' Association.

G. K. Chesterton was another celebrated speaker at the luncheon tendered the visiting Canadian writers by the Royal Society of Literature. The Marquess of Crewe presided and many notable Englishmen were present.

On a Holiday

Mrs. Roosevelt Visits Quebec City On Motor Tour

Quebec, Que.—Mrs. Franklin D. Roosevelt, wife of the president of the United States, who drove her own roadster into Quebec, after traveling several of her own United States gave a few minutes to reporters in her sitting-room in a hotel here.

"I am on a holiday," the first lady of the United States said, "and that means I have no definite plans." Before returning to Washington at the end of a fortnight, Mrs. Roosevelt said she intended going to her cottage at Campello, N.B.

Inaccurate Statements

Recounts Report That Roosevelt Wrecked Conference

Plymouth, England.—Laurence A. Steinhardt, United States Minister to Sweden, on his arrival aboard the "Le de France" described as inaccurate statements he was carrying new instructions from President Roosevelt to the American delegation to the world economic conference. Mr. Steinhardt said he would spend a week in London before leaving for Stockholm.

"I think it is grossly unfair and inaccurate," said President Roosevelt, "to say that Roosevelt wrecked the conference," the minister said.

SIR JOSIAH STAMP APPROVES U.S. RECOVERY PLAN

New York.—Sir Josiah Stamp, British financier and economist, approved President Roosevelt's recovery programme in an address from London.

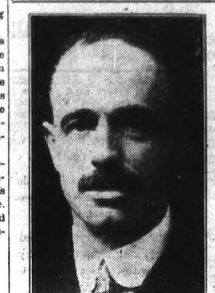

"I am one of those who think that the president's policy is to a large extent indeed right because all regular expedients have failed," said the text of his speech as made available here.

"Although I do not think that the control of industry can ever have more than a limited success at best and may create great insecurity at its worst, people on this side do not realize the depths of the difficulties into which the United States' price-level collapse and banking collapse have brought her industrial activities and how necessary it was for such striking measures to be put forward."

"I would also say that so far the public use made of the existence of the powers, as distinct from the actual use of the powers themselves, has also been shrewd."

"The great thing I have to fear is too high a degree of speculative activity with its inevitable reaction."

NEW MINISTER

Sir Eric Drummond, British Secretary-General to the League of Nations since its inception, has been appointed British Minister to Rome. Sir Eric Drummond resigned from the League post recently.

Usefulness Has Been Proved

Hon. Hugh Guthrie Upholds Section 98 Of Criminal Code

Calgary, Alberta.—Section 98 of the criminal code was upheld by Hon. Hugh Guthrie, Minister of Justice, in addressing the Calgary bar association. This section of the criminal code, containing prison terms for those advocating constitutional changes by violence and threats of violence, had proved useful recently, he declared.

In his brief address, the minister of justice described his duties and problems. He said the law as set forth in section 98 did not interfere with any law-abiding citizen. At the same time, he concluded, it had come in very handy in dealing with certain disturbance arising out of unemployment problems.

May Have Escaped Death

Boy Plunges Into Niagara Gorge To Escape Police

Niagara Falls, Ont.—A death defying leap into the Niagara gorge near the whirlpool by an identified 17-year-old youth after he had been handcuffed by provincial police is believed to have resulted in his escape. Police said they came upon the youth in the act of stealing copper wire from electric light poles near the edge of the embankment. The handcuffs had just been placed on the youth's wrists when he suddenly wrenched himself loose and plunged over the bank.

Police think his fall was broken by shrubbery and that he eluded them and escaped.

Dogs Travel By Plane

Calgary, Alta.—R. B. Carter and Dr. G. L. Kroshus, both of Assiniboia, Sask., brought their two prize dogs to Calgary's annual canine show by aeroplane. The Boston bull and Scotch collie made the air trip from Assiniboia in time to enter the judging Wednesday.

Fay Is Protested

Windsor, Ont.—Protest against what was described as employment of single men by the department of militia at various military grounds for 20 cents a day, was registered by Essex county trades and labor council. The protest will be sent in a resolution to Dominion government officials.

"BRAIN TRUST" HEAD IN LONDON

Assistant Secretary of State Raymond Moley (left), confidential adviser to President Roosevelt, pictured with Herbert B. Swope, outside the conference hall in London, where the economic parties are being held. Moley is acting as liaison between the President and the American delegation to the Conference.

Factor Is Freed

Abducted Millionaire Is Released By Captors

La Grange, Ill.—John Factor, millionaire market plunger, held prisoner 12 days by kidnappers, was released here Wednesday night after payment by his friends of ransom estimated at \$200,000.

He walked into the La Grange police station and reported that he had been freed by his captors a short distance away and instructed how to reach the place by street car.

He was held by the officials pending arrival of a squad of Chicago detectives and federal agents.

Factor, according to the sergeant, appeared little the worse for his experience. He was clean shaven and neatly attired.

He asked for the use of a telephone to get in touch with members of his family who had kept vigil at his Morrison hotel headquarters since the kidnapping.

TRUCE EFFECTED WITH GOLD BLOC AT CONFERENCE

London, Eng.—Monetary questions, tariffs and import quotas were finally cut out of the agenda of the world conference in an amicable truce with the European gold bloc.

Great Britain, the Dominions and the United States acquiesced in the gold-standard nations' view that nothing can be accomplished satisfactorily on the more important monetary questions so long as there is no stabilization of currencies until the U.S. changes its attitude.

To this extent the conference was right back where it was in the crisis of last week but there was an important difference. Then the incensed gold-standard delegates were ready to quit the party. Now they are well satisfied monetary questions are dropped and they will keep on working at the other questions.

The conference will go on, but it is expected to continue only two or three weeks in order to reach agreement on the non-contentious questions left on the agenda. Then the plan is to adjourn the conference proper until the fall, leaving some committees at work and hoping that before the conference meets again the U.S. will be willing to stabilize currencies. In that event the conference might tackle properly the broad program originally laid before it. Many delegates were very hopeful about this end.

Prime Minister R. B. Bennett, who characterized the decisions as permitting the work to go smoothly on, is prepared to return with the Canadian delegation at the end of July.

The steering committee accepted the recommendations of a special drafting committee of the full monetary commission, a committee of which Premier Bennett was a member. It decided it was no use going on with problems on which unanimous agreement is not likely.

The questions left are indebtedness, meaning long and short term commercial loans, not war debts; along with central banking co-operation, creation of central banks in countries which have not got them now, rehabilitation of silver and other questions on which the respective sub-committees think there is a chance of agreement.

A whole host of projects is under way outside the conference proper and the outlook for some of them is most promising. Canada especially has been working actively with other Empire delegations on furtherance of Empire trade and straightening out the Empire currency tangle, but what progress, if any, has been made on these topics of vital interest to the Empire is being closely guarded.

There is also wheat, timber and silver. Negotiations are said to be progressing very favorably on wheat. The Big Four—Canada, Australia, Argentina and the U.S.—are already agreed in principle on limiting production, regularizing exports. They are understood to have gained a considerable measure of co-operation from the European exporters. Now they are working on the importers.

Much of the groundwork for restoring the world's timber markets has been done, since Canada's earnest declaration that if Russian dumping continued to wreck the English market for her, she would ask the United Kingdom to make good her promise to maintain the imperial preference intact. All countries interested are busy during the summer organizing statistics of their production and exports, studying collective agreements.

PROGRAM FOR PRICE RAISING PUT FORWARD

London, Eng.—Some of the British Dominions were understood to be considering putting a world-wide price-raising program of wide scope before the World Conference for consideration.

This step was revealed as the Dominions were said to be putting pressure on the British government to unclinch sterling from the French franc and follow the American dollar, moderately. The Dominions are known to strongly want a "reflationary" program even if they do not want to go so far that a collapse would be risked.

Seemingly Canada is holding back from the move to set a price-raising program before the conference, a move that would include a demand for all nations to state what they can do to raise prices and how far they would like to raise them.

J. M. Keynes, noted British economist and outspoken exponent of "managed currency," set to work with Sir Henry Strakosch of India to draw up the Dominions' ideas of what the world should do to raise prices. The two, with General Jan Smuts of South Africa, and Stanley Bruce of Australia, held a meeting with J. H. Thomas, Secretary of State for the Dominions, to discuss the plan.

Following this meeting Keynes and Sir Henry began to draft a resolution. But Prime Minister R. B. Bennett did not attend the meeting, although he was said to be sympathetic to the idea.

The other dominion delegates, according to reports it was impossible to confirm, had addressed to Prime Minister Ramsay MacDonald and Neville Chamberlain that if the pound is kept pegged on gold, Australia, India and New Zealand might be unable to service their heavy debt burden. They were said to have argued something must be done to increase prices of the raw materials on which these countries depend for prosperity.

The pound sterling has provided the conference with a new mystery, and the empire with a new issue. Ever since the United States dollar began its hectic downward career the British pound has remained practically stationary in terms of the French franc, the leading gold standard money.

As the franc is on gold the report has constantly run around the conference lobbies that the British equalization fund was being used to link the pound with the franc, and in fact the pound was again on gold.

The British treasury, characteristically silent, declines to reveal how the big equalization fund is being used. It is authoritatively stated, however, the British policy on sterling is not likely to be determined until the future of President Roosevelt's program is more evident.

From the present situation it is pointed out Canada is benefiting twice. The depreciated Canadian dollar in England means the western farmer is getting more dollars for the product he sells on the British market, also the U.S. dollar's slide has narrowed the spread between the Canadian and American dollars, meaning relief to that extent on Canadian payments in the United States.

A New Pest

Ottawa, Ont.—The Japanese beetle which, according to United States research officials will eventually spread from coast to coast, attacking crops and flowers, has not yet come to Canada, agricultural officials said. Whether the Canadian winters would be any protection against the pest is therefore not known.

Studying Wage Plan

Washington.—With the Roosevelt government considering a plan for fixation of minimum wages and maximum hours for all industries until the recovery program takes effect, new agreements by industry were submitted by Hugh S. Johnson and set down for quick hearings.

To Attend Grain Show

Quebec, Que.—Hon. Adrien Godbout, Quebec Minister of Agriculture, accompanied by J. A. Grenier, Deputy minister, and Paul Methot, chief of the seed grain section of the department, are in Regina, to attend the World Grain Fair.

Deposits in the post office and trustees savings banks in England increased more than \$108,000,000 last year.

Milne's Meat Market
 Jas. Milne, Prop. Phone 46 Blairmore, Alberta

Mrs. D. Walker and children are holidaying with friends up the South Fork.

The city editor wouldn't agree it was news, so William E. Worthing paid to have this advertisement published: "Notice—Mr. and Mrs. William E. Worthing, of Muskogee, 1933 Valley Street, wish to announce that they are expecting their first babe in November."

Several lads returned over the week end from several days fishing up the North Fork. Arthur Ennis states that a truck coming through The Gap with one of his fish was unable to make a sharp turn in the road without bending or perhaps damaging the fish's tail, which overhung some three feet beyond the rear end of the vehicle, and it became necessary to call the relief workers to build three hundred yards of new road. The fish was caught on an ordinary can hook, and a bed spring, attached to two telephone poles, was used as a landing net. Art says: "It's the world's largest sardine."

Miss Margaret Patterson is a holiday guest for a few days of Miss Bessie Barnes at Corbin.

When the town of Macleod recently held its annual tax sale, no bidders turned up. Of forty-five parcels offered for sale, six were redeemed, while thirty-nine reverted to the town. A sign of the times which may easily be duplicated in even the best of towns when the tax sale is held.

The hearing of appeals against decision of the court of revision was on Thursday last adjourned to some future date. The commissioner's department at Edmonton received no advice from the Blairmore council of appeals, quite a number of which were in the hands of the secretary. Word of appeal, however, was received in Edmonton direct from Safety Stores Limited, Calgary. It will be remembered, in this connection that the council, as a court of revision, some time ago refused to entertain appeals against general assessment or the business tax.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Mr. and Mrs. R. Rinaldi were Sunday visitors to Champion.

Miss Aileen Picard was down from Windermere during the week on a visit to her parents.

Robert Smallwood stopped off here today, returning to Calgary from a visit with his son Percy at Corbin.

R. J. Dinning, liquor commissioner, was in town on Thursday, accompanied by Mr. Pollis, hotels inspector.

Miss E. M. Christopher left Lovett Friday for Edmonton, where she will spend the holidays with her parents.—Edson-Jasper Signal.

The Catholic summer school, which has been in operation at the local school house for the past two weeks, concluded last week end.

Learning that a certain solicitor occupied an office in which to practice law, a local school kid asked: "And where does he do his work, then?"

Mr. and Mrs. J. R. Gresham returned to Okotoks last week from the Flathead district, where Mr. Gresham had been relieving the customs official for a few weeks.

The question has been asked: "What right has the Blairmore town council to send a delegate to the unemployed council in Ottawa at the expense of non-communist ratepayers?"

Ronald McDonald, of the Royal Bank staff at Foremost, is home on a vacation visit to his parents, Mr. and Mrs. J. Angus McDonald. His sister, Mrs. P. Wasnock, is expected from Seattle tomorrow.

Two nurses at the Royal Infirmary at Leicester have been asked to resign, because they followed the example of the German film star, Marlene Dietrich, and appeared on the streets in flannel trousers.

Bill Fraser was admitted to the local hospital yesterday forenoon, where an operation for appendicitis was performed. Bill had just returned the day previous from a fishing trip up Race Horse Creek.

Both parents and two of three children, Peigan Indians, died following a crossing accident near Brocket on Monday, when their car is believed to have stalled on the C.P.R. tracks, and was hit by the eastbound passenger train.

Mr. Cole regrets having to change the dates of "Be Mine Tonight," originally billed to play Bellevue for this week end. It will be shown at Michel, August 3rd to 5th, and will be taken back to Bellevue at a later date.

Jack Kerr, Cecil Johnson, Colin McDonald and Alex. McDowell returned on Friday last from a two-week motor trip as far as Chicago, where they took in the big fair. Fred Holmes, the other member of the party, returned on Sunday.

Frank A. Beebe, who for the past couple of months has, with Mrs. Beebe, been a guest of his father, Capt. W. A. Beebe, leaves today for Regina, where he is to assist one of the leading bands at the World's Grain Exhibition. Mrs. Beebe accompanied him to the prairie city. They hope to return to Blairmore at a later date.

George Palmer, who spoke here last Saturday night, gave a very interesting talk on "Russia As I Saw It." Mr. Palmer is said to be a Communist, and as such, perhaps he viewed Russia through colored glasses; but in his talk he tried to be fair, and many of the points mentioned were in favor of the Russian system and many were not. He told both sides of the question, and made an effort to be unbiased.—Drumheller Review.

BLAIRMORE PUBLIC LIBRARY

NOTICE—Until the 31st August, the Library will be open on Saturdays only, from 7 to 8 p.m.

Misses Anna Kubie and Millie Pondelick were visitors to Lethbridge the early part of the week.

Richard Harrison was down from Michel on Monday evening, to attend the funeral of his brother Charles.

Leonard McDonald is down from Calgary, relieving Mr. Hottel at the local Safeway store while the latter is on holiday.

Mr. and Mrs. Tommy Longworth, of the Lethbridge-Union hotel, Calgary, are enjoying a vacation on the Pacific coast.

Mrs. E. A. Harper and two sons are enjoying a holiday at the Pacific coast. "Dick" is doing as well as can be expected.

The Nash Symington Company, Limited, intends to make application to the registrar of companies for leave to change its name to Dominion Fruits, Limited.

Joseph Handley and son James, who came down from Creston to attend the funeral of Mr. Handley's step-brother, Charles Harrison, returned home on Tuesday.

Blairmore, Bellevue and Cofeman were almost minus their populations yesterday, and the roll call at Castle River would have accounted for ninety per cent of 'em.

When Melsae started the bagpipes going at Castle River yesterday, the shock paralyzed 19,842, gophers and moles. Several Scotchmen present were also seriously affected.

Mr. A. J. A. Hoyle, travelling passenger representative of the Cunard Line (Anchor-Donaldson and Anchor) whose office is at 729 Third Avenue West, Calgary, is in town today.

A man in East Coulee, near Drumheller, claims that relief officials should be responsible for unborn babies and should know where and when the stock arrives. Well, we don't want the relief commissioner's job!

One of the best stories we have heard or read lately is Walter Fisher's description of how the business world is acting in the depression. "It strikes me," he said, "that we're all in same boat with Christopher Columbus. He didn't know where he was going when he started. When he got there, he didn't know where he was. And when he got back, he didn't know where he had been."

The invasion of western sports into Japan has brought about a large demand for sporting supplies. Those sports include ice-skating in north-eastern Japan, skiing, hockey, golf, tennis, baseball and football. There are four artificial ice skating rinks in Japan—one in Tokyo, one in Yokohama and two in Osaka. Canada is the largest supplier of racing and hockey skates and hockey sticks.

DR. A. E. SHORE, of Drs. Gunn, Hackney & Shore, Calgary, will be at the office of Dr. Stewart, Blairmore, on Saturday, July 22nd, after 2:00 p.m. Any one wishing to consult him with regard to Eye, Ear, Nose or Throat conditions, or to be fitted with glasses, please make appointments with Dr. Stewart.

SCHOOL NOTICE

Children who will have reached a full age of six (6) years previous to Dec. 31st, 1933, may be registered for the coming School Year, commencing on August 28th. Registrations to be made at the Town Office before July 25th. Children not admitted at this time will not be permitted to enter school once the year has started. Proof of age will be necessary when registering. BOARD OF TRUSTEES, July 13-20] S.D. No. 628.

Rev. Archdeacon A. H. Greegan, of the rector of Christ church, died at Gananoque, Ontario, on July 17th, aged 61. Frank G. Greegan, teller of the Bank of Commerce, Coleman, is a son.

G. Powell, grand chancellor of the Alberta K. of P.s., with his wife and daughter, have left Wayne to take up permanent residence in Drumheller.

The attendance at the Cas'le River Club stampede yesterday was the largest on record. Upwards of 2500 admission tags were sold, while at least three hundred autos were parked on the grounds. The programme was carried through without a hitch and all events were keenly contested, including bull-dogging, wild cow milking, calf roping, wild steer and calf bareback riding, bucking horse riding, etc. List of events and winners will appear in a later issue of The Enterprise. At night, a grand dance was held in the community hall at Beaver Mines, where hundreds flocked to gain admission, owing to the great crowd. Prominent among the managers were noted Jimmy Miller, Wal Eddy, Fred Forster, Harvey Bassenberry and Jim Smith and his pals.

It is very interesting to local people, who know that a well equipped and well established printing office is located in town, to note that the accounts they receive at the end of the month are made out on paper printed at Lethbridge. In all seriousness, we would claim that any such business firm should look to Lethbridge for their patronage. It's a case where we pledge ourselves to buy from local stores, and the local stores appreciate that patronage to such an extent that they must send away for their printing. Where is the principle? Our patronage goes a long way toward helping local business people to pay their taxes and other obligations, while all that can be expected from the foreign concern wouldn't buy a three-cent stamp in seventy-five years. Think it over!
